

Handle Assembly Instructions

Step 1
Gun Assembly

Step 2
Insert rod thru recoil and small
spring, then into handle hole.

Step 3
Insert gripper plates onto rod, make sure
rod sticks thru gripper plate about 1/4".

Step 4
Place spring onto rod, make sure
trigger is forward. Place screwdriver
behind first coil of spring.

Step 5
While compressing spring with screwdriver,
push downward.

Step 6
Slide spring into position. Make sure spring
is centered about the handle hole, then push
rod forward. Remove screw driver and push
rod thru handle hole.

Step 7
The handle is assembled.
The adjustment screw can be adjusted
if there is too much play in the trigger
or if the rod is difficult to pull back.
