

Product Knowledge Training Video Quiz 5

“The Widest Selection of Caulking
Nozzles in the Industry”

(<http://albioneng.com/product-resources-videos>)

- 1.) True or False: Using the proper nozzle allows caulkers to efficiently place the right amount of material in the right size and bead shape for their application. (1pt.)
- 2.) True or False: You can get a 1 3/4" round nozzle by cutting down the Albion Engineering cone nozzle. (1pt.)
- 3.) True or False: Round nozzle sizes include 1/8", 5/8" or even 3/4". (1pt.)
- 4.) True or False: Beveled or Ribbon bead nozzles come in sizes from 3/64" up to 2 1/2" using a cap. (1pt.)
- 5.) True or False: Albion Engineering offers triangular nozzles. (1pt.)
- 6.) True or False: Twin Bead nozzles allow you to put a set of beads on centers from 1/2" to 2 1/2" by using a double nozzle cap or by a cove-base nozzle. (1pt.)
- 7.) True or False: Angle shot nozzles help extend the reach of a cartridge to get into difficult places. (1pt.)
- 8.) True or False: Nozzle extensions allow you to extend your reach by 3", 6", 12" or 18" lengths. (1pt.)
- 9.) True or False: The precision metering nozzle allows you to cut a design into the plate if you need a V-shaped bead. (1pt.)
- 10.) True or False: Albion Engineering offers a dotting nozzle that allows you to put a dab of caulk on a screw head. (1pt.)

Bonus Question: What is another name for a flattened bead nozzle? (2pts.)

Answer: _____

Score: _____/12
